Summary

Full-stack Software Developer with 2 years of hands-on experience building and maintaining production-grade Angular and Node.js applications. Experienced in delivering business-critical enterprise systems with a focus on scalability, performance, and maintainability. Strong skills in RESTful API design, relational database management using MySQL and PostgreSQL with Sequelize, and performance optimization through Redis caching and efficient async data handling. Proven ability to contribute across multiple concurrent projects, collaborate with cross-functional teams, and deliver reliable solutions in fast-paced environments.

Technical Skills

- **Frontend:** Angular, TypeScript, JavaScript, RxJS, Reactive Forms, Routing, Directives, Pipes
- **Backend & APIs:** Node.js, Express.js, REST API Development, Swagger (OpenAPI), Sequelize ORM
- **Databases & Caching:** MySQL, PostgreSQL, Redis
- **Architecture & Integration:** Role-Based Access Control, API Integration, Async Data Handling
- **Tools:** Git, Azure DevOps, VS Code, Postman

Experience

Software Developer (Full Stack)

Feb 2024 – Present

OdiTek Solutions, India

- Developed and maintained production-grade **full-stack applications** using Angular and Node.js (Express).
- Worked on a **Payroll and Tax Processing System** including W-2 tax statements, Independent Contractor (IC) workflows, PSR modules, audit logs, and compliance-driven UI screens.
- Designed and integrated **RESTful APIs** to support payroll processing, reporting workflows, and role-based access control.
- Built onboarding, vendor, and questionnaire-based modules with dynamic forms, validations, and conditional UI behavior.
- Managed relational data using **MySQL and PostgreSQL** with **Sequelize ORM**, including query optimization and schema design.
- Implemented **Redis caching** to reduce database load and improve API response times for frequently accessed data.
- Improved application performance by optimizing API consumption, async data handling (RxJS, async/await), and frontend change detection.
- Reduced production issues and rework by implementing structured error handling, logging, and API response standardization across frontend and backend layers.
- Actively participated in requirement discussions and production support, contributing to smoother releases and faster turnaround on payroll-critical fixes.
- Collaborated with cross-functional teams while contributing to **multiple concurrent production projects**.

Education

2022 – 2024 Master of Computer Applications (MCA), **Trident Academy of Creative Technology**, Bhubaneswar
